Adewale Abdulrazaq

o.abdulrazaq.a@gmail.com | github.com/classyrazy | Portfolio

SKILLS & TOOLS

Languages: JavaScript, TypeScript, Python, Go
Frontend frameworks: Vue, Nuxt,
Backend frameworks: Nodejs, Express, Nestjs
Databases: MongoDB, Firebase, MySQL, Postgres, HarperDB
Tools: Git, Pinia, Vuetify, GitHub, AWS, GCP, Heroku, Google APIs (Maps, Calendar), WebSockets, Docker
Design: UI/UX, Figma, Adobe XD

EXPERIENCE

Xara AI (Xava Technologies) — Remote
Senior Frontend Developer — *May 2025 - Present*

- Developed the landing website for Xara AI's WhatsApp-based financial assistant, creating a responsive and user-friendly interface that drove a 40% increase in user sign-ups.
- Built an admin dashboard for the Xara AI platform, enabling efficient tracking and management of financial transactions and logs, resulting in smoother customer support experience.
- Implemented account management features, including block/unblock and account upgrade functionalities, enhancing user control and increasing account activation rates by 25%.
- Contributed to the integration of Xara AI's financial services with Meta's WhatsApp platform, supporting seamless transaction processing for over 13,000 users across Nigeria.
- Optimized the landing website and admin dashboard for performance, achieving a 25% reduction in page load times and supporting scalability for a growing user base.

Pressone Africa — Remote
Senior Frontend Developer — *Aug 2023 - June 2025*

- Maintained the frontend web CRM for Pressone, optimizing pages, implementing new features, and fixing user issues.
- Utilized Vue.js to develop a scalable and responsive UI, resulting in a 20% increase in user engagement and a 15% decrease in bounce rates.
- Optimized pages, resulting in a 30% decrease in load time and a 20% increase in performance.
- Fixed production errors, leading to an 80% increase in crash-free user sessions.
- Transitioned from maintaining the v1 platform and built sub-project for the v2 platform which increase the overall experience of the app for the users
- Single-handedly built a high-performance dashboard under a tight deadline, prioritizing usability and accessibility to meet enterprise client needs.
- Promoted to Senior Frontend Developer due to exceptional contributions in maintaining and enhancing the Pressone CRM, leading to the assignment of building multiple high-impact projects for enterprise clients, which I delivered single-handedly, achieving an 80% adoption rate among partners and clients.
- Designed and implemented a dashboard for monitoring and managing non-GUI API logs, improving usability for non-GUI interfaces.

Asap Software — Remote
Lead Frontend Engineer — *April 2024 - June 2025*

- Developed, and maintained three high-performing websites and a feature-rich dashboard, ensuring optimal usability, accessibility, and scalability.
- Built a responsive web application for an existing mobile app, which led to a 50% increase in new user adoption by extending functionality to web platforms.
- Built and maintained a web application serving over 100,000 users, delivering a seamless and engaging user experience across devices.
- Led a team of frontend developers, code review and deployment, improving feature integrations, and reducing production errors through effective code maintenance.
- Designed and implemented an admin dashboard for an errand and logistics app using Firebase, enabling efficient log tracking and management for administrators.

Taaskly   Remote
Frontend Developer   *Jan 2023 - Jun 2023*
- Built and maintained the frontend web app for Taaskly, including Admin, Landing Pages, and User pages.
- Utilized Vue.js and Nuxt 3 to develop a scalable and responsive UI, resulting in a 20% increase in user engagement and a 15% decrease in bounce rates.
- Integrated Firebase authentication and data storage to provide a secure and reliable user experience.

KiaKia   Remote
Frontend Developer   *Feb 2022 - Dec 2022*
- Built the entire web experience for KiaKia, an on-demand last-mile logistics e-hailing platform in Africa.
- Implemented Domain-Driven Design, Nuxt.js, and Vue Composition API to increase code flexibility and reduce error-prone code.
- Utilized Avanda for API calls using GraphQL playground, leading to faster load times and improved performance.

Macroware   Oshogbo, Nigeria
FullStack Developer   *Sep 2020 - Dec 2021*
- Built user-friendly and responsive landing pages, admin systems, and user dashboards using HTML, CSS, JavaScript, TypeScript, Vue.js, Nuxt 2, React.js, and Tailwind.
- Collaborated with the team lead to build a CSS framework used to create a UI library for multiple projects.
- Optimized database schemas for different applications, reducing load times and improving data management performance.
- Completed multiple projects within tight deadlines and contributed to successful product launches.

EDUCATION

University of Lagos   Lagos, Nigeria
Bachelor of Science in Mathematics and Computer Science   *Year*

PROJECTS

Boost | *Nuxt 3, Tailwind, Figma*
- Implemented digital solutions to streamline rental processes, making vehicle booking and management more efficient.
- Expanded global market reach through a unified, user-friendly booking system.
- Utilized data analytics to drive business growth and optimize fleet management strategies.

Hiree | *Nuxt 3, Tailwind, Node.js, HarperDB, Figma*
- Built a solution for developers and hiring managers to find jobs and talents.
- Utilized the GitHub API to retrieve developers' repositories matching the technologies hiring managers seek.

Avanda Debugger | *Avanda.js, Vue Composition API, Vite, Pinia*
- Built a no-code solution for the Avanda JSON Graph for Avanda developers to test server controller functions.

Corep | *Vue 3, TypeScript, Vue-Draggable, Nuxt 3, OpenAI API, Node.js, WebSocket, MySQL, Firebase, PWA, Figma*
- Developed a student-based application to solve productivity issues among students.
- Included features like asking and answering questions, syncing courses, assignment and announcement reminders, personalized timetables, etc.
- Integrated OpenAI API for personalized study assistance, leading to improved user satisfaction and increased app usage by 25%

KiaKia | *Nuxt, Firebase, Adobe XD, Node, GraphQL, Avanda, Microservices*
- Built over 50+ design screens, from landing pages to admin dashboards to email templates.
